The Skinny:

- Moisture from Upper Level Disturbance “Phased” with Remnant of Pacific Hurricane Vance Will Provide Welcome Rain to Texas
- Slow-moving, multi-phased disturbance combined with a tap from the mid latitude jet stream will bring prolonged brisk, chilly, and wet weather to the RGV

Potential hazards will be from

- Nuisance Flooding of Poor Drainage Locations
- Dangerous Winds and High Waves on Gulf

Wrap

- **Rainfall/Flooding:** Midnight to Noon Thursday; additional lighter rain after. Poor drainage flooding possible; ponding elsewhere. Keep ditches clear.
- **Boating/Fishing:** Wednesday Looks Favorable (but watch for morning showers). Postpone Thursday and Friday trips
- **Lightning:** Not favored in this event. Prepare, just in case, Wednesday afternoon (Ranches/Upper Valley) and evening (Lower Valley)
- **Chill:** "Feels Like" 50 (15 to 20 mph wind combined with 58-62 degree temps) Thursday 6 AM through Friday noon. Coldest "feel" since March 25, 2014. Sweaters (and umbrellas) Up!
